Designer:
C+S Architects

Product: Bench model “ARROW”, composed by a monolithic, arrow-shaped seat. The bench can be fastened to the flooring for enhanced stability and security.

Dimensions: length: 2550 mm;
width: 1456 mm;
height: 400 mm;
total weight: about 819 kg.

Material: The bench can be manufactured using reconstituted natural marble stones or white granite conglomerate.

Reinforcing: The bench is reinforced and endowed with bushes that permit its lifting, and that are covered with a Bellitalia plate after the placement.

Finishing: All surfaces are sandblasted, except for the seating surface that is polished, to give the product a shiny effect. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with nanotechnology and/or anti-graffiti products. All edges are rounded or made blunt.

Handling: Use appropriate equipment when handling.

Installation: The bench can be simply placed on the flooring; otherwise identify the correct position, drill the holes and fasten to the ground through thread bars and a bi-component chemical anchor.
